

## Which New Energy Source is the Best?

Woodrow Riley, 11/11/2008

Which new energy source is the best inheritance money? Is that a trick question? Nope. Answering which is the very best new energy source is directly tied to what we intend to inherit. Crude oil has left a sour taste in the world's collective mouth so the next Energy we all decide to satiate everyone with electricity and locomotion needs to be something [a good deal better thought out](#) than Mankind did when we all decided to drink from the same oil barrel.

As a general rule written in humanity stone we never get the choice of plans; we just stumble along inheriting plans somebody else thought up before we were born. Our elders gave us crude oil and mandatory schoolhouse learning that should partly now already be replaced with home~computer schooling. **No one alive today voted for either one.** We popped out of a womb and that's what was in place. The current crude oil company executives are not at fault because this is what we are all doing. If Chevron, Exxon-Mobil and Shell oil company execs are guilty **then we are all guilty.**

I have been digesting some long reports about coming energy sources. On the surface, clean diesel looks good. So do small town usa neighborhood-sized mini-nuclear power plants buried just outside town so no one has to think about them (but we will). Another is liquified natural gas, super-cooled in tankers to reduce the space it requires to 1/600th. So 600 tanker's worth of LNG can be shipped in one single tanker. One sleeper technology many people already know about is making a liquid diesel-like engine fuel from coal.

The number of new technologies being "floated" before us is interminably longer than any Rose Bowl Parade in Pasadena Ca I **EVER** watched while growing up, all due respect to Tom Brokaw and Jane Pauley. You will notice that all these new fuels have several things very much in common with crude oil => they **#1** burn or combust fuel & **#2** they [delete mountains or other important \(really unnecessary\) stuff out from under our feet or Earth's mantle.](#)

We already inherited crude oil from under the ground so maybe we should pause now and ask a few pertinent questions like

**HOW DID THAT TURN OUT SO FAR? and  
DO WE WANT TO REPEAT THAT?**

Each new technology will make a few people rich when they, again like crude oil charging everyone for their new creation. Does that appeal to you? OPEC goes down in flames only to be replaced with another stopgap approach to progress for the "Human Family" under our belt? Been there done that. No; it's just exchanging out the old master for a new fresh master and the energy bill and electric bill and the water bill all keep coming just like under crude oil, kerosene lanterns, floor furnaces using gravity-fed #2 diesel oil or even kerosene mixed with diesel so it does not freeze in cold weather. But the end result is the same => we all live under some fuel company's thumb.

**Is that what you want?** I used to be like you and everybody else thinking energy had to be some fuel being burned, combusted, pollution a necessary and unavoidable result of being a human being. Think about that please.

## **Is the human being so-called homo sapiens just a very large poop-trailing earthworm species?**

In Bible History, as well depicted in the Charlton Heston-featuring movie The Ten Commandments, the real vs the celluloid, we have Moses telling Pharaoh that one day men will no longer be slaves to be used as beasts of burden their backs bent doing other men's labors, such as laboriously building the pyramids. That was a marvelous and very advanced idea for that time **and it still is!** I have written numerous web pages about the superiority of "my engines" so you may think this page is going to drop into a **MINE ARE BEST RANT**. That isn't the point.

The point is that my engines give self-respect by being "closed systems" that do not leave an earthworm-like poop trail and those others do. Therefore when I "sell" people on my engines they are not "**just one more engine**" amongst all the others listed above. Nope. My engines bring to all mankind's table a **vastly-elevated level of SELF-RESPECT** men & women have never enjoyed **in the history of all humanity** making us children of God if we just had time to hear the voices standing at doors and streetcorners saying it.

When we stay shackled to combustion fuels it is much worse than ancient Egypt because today men are serving as beasts of burden to drill the fuel -or mine it- while all people who need it to live and keep their family provided for in the winter have to work jobs to pay for it. Is this anything but a double job, a double decker donkey-burning both ends of the limited human clock? Whew it sure is! So roughly one third of us labor to get the "fuel of the day", one third of mankind works to transport it, and the full three thirds works to pay for it?

**Yep, that's the awful truth my earthworm friends.  
Then we have to clean up the poop we made,  
the leftover pollutants (more dineros)  
& hospitalize those it sickened  
-Medicare straight\$flush-**

This all means every one of our earthworm and earth-crawling lives' time being sent through **the greatest time meat grinder of all human history**. That is why my engines are from God, why I have aggravated Internet-TV readers and scientists and governments saying they are from God, even risked being shot or otherwise being unduly demised to show you all the way to stop being **EARTHBOUND WORMS: STAND UP AND BE GOD'S MEN AND WOMEN**.

**Stand up!** Claim a real inheritance from our Father in Heaven who put the [Laws of Physics](#) in place for us. **Stand up!** Learn God's Will and baptize your life to finally Witness God [as a fully fed human](#) no longer to slide on your belly like a serpent! The real kingdom is come => "**Thy Will be Done on Earth as it already is in Heaven!**" (where nobody pays for energy). Pray for it because it does not need your money to rule, **your sweat to grease its wheels** => world economy, and it knows your need for Clean Energy and is supplying it. Some of those pre-Creation energies have already been provided as explained on my web page links in the top section of this page => [pdflistfor2008.htm](#).

Knock-Knock: [Revisit the Bible soon and learn even more than that.](#)
